/ WORK EXPERIENCE

>> Software Engineer III

Walmart Global Tech | Bangalore | 2020 to present

At Walmart responsibilities include designing and developing product which helps to provide insights into sourcing and procurement data to drive business results.

Along with BAU tasks, also involved with doing POC's, participating actively in various ih-house hackathons, mentoring young talent and contributing to hire best talent for Walmart.

>> Senior Associate

Ernst and Young GDS | Bangalore | 2019 to 2020

BAU task involves design discussion and implementation of efficient and scalable solutions to business problems.

Working with frontend technologies like Javascript (ReactJS), CSS along with backend technologies like Nodejs, MongoDB to develop products as per varied business requirements.

>> Senior Software Engineer

HSBC Software Development India | Pune |2016 to 2019

Developed an online portal by the name 'Solution Hub' where users can actively register and ask/answer questions along with many other functionalities like upvote, edit, delete answers and questions, maintain and update his/her profile. Technologies used include - ReactJS, NodeJS, ExpressJS, Multer, MongoDB etc.

Developed UI screens for on-boarding HSBC's commercial customers. The customer, once a case is created for them can also login via customer portal and edit details by a responsive UI.
