/ EDUCATION

>> **National Institute of Technology Durgapur**
Bachelor of Technology (IT) | CGPA 8.49 | 2012-2016

Undergraduate project work
Development of a student portal, Student-O-Pedia, where user is required to register and can access and edit his personal page on the website upon admin approval.

Creating and simulating the algorithm for shortest path formation using a swarm of bots in Net Logo that equidistantly align themselves between the source and destination in an obstacle free environment.

/ WORK EXPERIENCE

>> **Senior Associate**
Ernst and Young GDS | Bangalore | 2019 to present
BAU task involves design discussion and implementation of efficient and scalable solutions to business problems.

Working with frontend technologies like Javascript (ReactJS), CSS along with backend technologies like Nodejs, MongoDB to develop products as per varied business requirements.

Working in an agile manner so as to effectively meet development and marketing timelines.

>> **Senior Software Engineer**
HSBC Software Development India | Pune |2016 to 2019
Developed an online portal by the name 'Solution Hub' where users can actively register and ask/answer questions along with many other functionalities like upvote, edit, delete answers and questions, maintain and update his/her profile.Technologies used include - ReactJS, NodeJS, ExpressJS, Multer, MongoDB etc.

Developed a portal for HSBCNet users to download reports with an enhance UI based out of ReactJS.

Developed UI screens for on-boarding HSBC's commercial customers. The customer approaches the bank RM's who then guide bank's staff to onboard the customer by creating a case. Bank staff feeds in customer details and attaches relevant services to the customer. At the end PDF is generated which will be signed by the customer. The customer, once a case is created for them can also login via customer portal and edit details by a responsive Ui.
